

B1 forwarding the e-mail message to an end-user's terminal wherein the copy of the at least one Web page may be reviewed by the end-user.

---

B2  
C1  
0074 3. (Amended) A method of attaching a copy of at least one Web page to a first e-mail message comprising:

receiving an address associated with the at least one Web page;

retrieving the at least one Web page;

automatically bundling a copy of the at least one Web page into the first e-mail message;

and

automatically forwarding the first e-mail message to a user's terminal wherein the copy of the at least one Web page may be retrieved and reviewed by the user at the user's terminal.

---

B3 5. (Amended) A computer readable medium for controlling a system, including a client terminal and a server, so the system's operations comprise:

receiving at least one search term at the client terminal;

bundling the at least one search term into a first message at the client terminal;

forwarding the first message from the client terminal to the server;

issuing the at least one search term as a search request from the server to a search engine;

receiving links to a plurality of Web pages that are associated with the at least one search term at the server;

issuing a request for at least one of the plurality of Web pages;

receiving the at least one Web page by the server;

the server automatically copying the at least one Web page into at least one e-mail message by the server; and

the server automatically forwarding the at least one e-mail message from the server to the client.

---

B4 8. (Amended) A computer readable medium for controlling a system, including a client terminal and a server, so the system's operations comprise:

BT  
C1  
cont

receiving at least one search term at the client terminal;  
bundling the at least one search term into a first message at the client terminal;  
forwarding the first message from the client terminal to the server;  
issuing the at least one search term as a search request from the server to a search engine;  
receiving links to a plurality of Web pages that are associated with the at least one search term at the server;  
issuing a request for at least one of the plurality of Web pages, wherein the at least one Web page comprises a sub-plurality of the plurality of Web pages wherein the at least one Web page comprises a sub-plurality of the plurality of Web pages;  
receiving the at least one Web page by the server;  
copying the at least one Web page into at least one e-mail message by the server; and  
forwarding the at least one e-mail message from the server to the client;  
wherein the at least one e-mail message comprises a plurality of e-mail messages, and at least one of the sub-plurality of Web pages is copied into one of the plurality of e-mail messages.

BS

12. (Amended) A method of attaching at least one Web page to an e-mail message comprising:

receiving at least one search term;  
issuing a search request to a search engine using the at least one search term;  
receiving the hit list from the search engine;  
retrieving at least one Web page based on the hit list;  
bundling a copy of the at least one Web page into an e-mail message; and  
forwarding the e-mail message to an end-user's terminal wherein the copy of the at least one Web page may be reviewed by the end-user;  
wherein the bundled at least one Web page includes a link to another retrieved Web page, wherein a copy of the another retrieved Web page is also bundled into the e-mail message.

*Please add the following new claims 13 and 14:*

13. (New) The computer readable medium of claim 5, wherein the server is an e-mail server.

14. (New) The computer readable medium of claim 5, wherein the client terminal is off-line with the Internet, and the server is connected to the Internet.
